

JOHN JEBAS

Cyber Security Analyst (Tier 1&2) | Microsoft Sentinel VAPT | EDR

Chennai, Tamil Nadu • +91 8939890285 • johnjebas02@gmail.com • [linkedin.com/in/john-jebas-a24659275](https://www.linkedin.com/in/john-jebas-a24659275)

PROFESSIONAL SUMMARY

Cyber Security Analyst with 1 year 5 months of production Security Operations Center (SOC) experience at TVS Electronics, managing threat detection and Incident Response across 200+ endpoints using Microsoft Sentinel and KQL. Investigated 25+ security incidents monthly including phishing, brute-force, malware campaigns and authored 15+ custom SIEM detection rules that cut false positives by 30%. Hands-on VAPT experience across 10+ web applications using Burp Suite, Nessus, and OWASP ZAP. Splunk-certified; CEH in progress.

PROFESSIONAL EXPERIENCE

Cyber Security Analyst – SOC Tier 1&2 — TVS Electronics

March 2025 – Present

- Monitored and triaged 10+ security alerts/day using Microsoft Sentinel SIEM, reducing mean time to detect (MTTD) by 15% through proactive threat hunting with KQL.
- Created and tuned 15+ SIEM detection rules, alert playbooks, and incident workflows, resulting in a 30% reduction in false positives and faster SOC response.
- Investigated and contained phishing campaigns, brute-force attacks, suspicious login anomalies, and malware incidents with full root cause analysis and remediation documentation.
- Conducted VAPT on 10+ web applications and internal systems, identifying critical vulnerabilities including XSS, SQL Injection, authentication flaws, and security misconfigurations.
- Executed vulnerability scans across 200+ endpoints using SecPod SanerNow and Nessus; prioritized findings using CVE scoring and validated post-patch remediation.
- Managed endpoint security using Bitdefender EDR, performed malware detection, threat containment, and incident triage across Windows and Linux environments.
- Generated detailed incident and VAPT reports with actionable remediation recommendations, improving cross-team patch compliance by 20%.
- Collaborated with IT and network teams to implement firewall rule reviews, hardening measures, and IOC-based blocking using VirusTotal and threat intelligence feeds.

TECHNICAL SKILLS

SIEM & Threat Detection: Microsoft Sentinel, KQL, Log Analysis, Threat Hunting, Alert Tuning & Triage, Playbook Development

VAPT & Security Testing: Burp Suite Professional, Nessus, Nmap, OWASP ZAP, SecPod SanerNow, CVE/CVSS Scoring, Exploit Validation, Recon

EDR & Incident Response: Bitdefender EDR, Malware Detection, Root Cause Analysis, Threat Containment, VirusTotal, IOC Analysis, SOAR Concepts

Networking & Platforms: TCP/IP, DNS, HTTP/S, Firewall & Packet Analysis, Windows, Linux (Kali)

Scripting & Tools: KQL, SQL, Python (Basic), Bash

CERTIFICATIONS

- Certified Ethical Hacker (CEH) — EC-Council — In Progress
- Security Operations and Defense Analyst — Splunk
- Understanding Threats & Attacks — Splunk
- Cybersecurity Essentials — Cisco Networking Academy
- SanerNow Cyber Hygiene Platform — SecPod

EDUCATION

Bachelor of Technology — Computer Science and Engineering | CGPA: 7.91

Dr. M.G.R. Educational and Research Institute, Chennai • 2020 – 2024

PROJECTS

IFLEX TRAX 1.7 — Secure User Authentication System | Python, Django, MySQL, HTML, CSS, JavaScript

- Built a Django-based user authentication system with secure session management, form validation, and MySQL backend — simulating real-world identity & access management (IAM) concepts.
- Implemented input validation and SQL injection prevention following OWASP secure coding guidelines.

ADDITIONAL INFORMATION

- Active on TryHackMe and HackTheBox — practicing CTF challenges in web exploitation, OSINT, and network forensics.
- Familiar with cloud security monitoring concepts including Azure Security Center and Microsoft Defender for Cloud.
- Quick learner with strong documentation, analytical, and cross-functional communication skills in SOC environments.
